Custom template classes

The FOLIUS template was built using the Bootstrap framework
http://getbootstrap.com/ and contains the full set of the Bootstrap assets.
All the Bootstrap basic features are applicable to the FOLIUS HTML template.

For the better and quicker code modification we have set some useful custom css classes.

Basic Colors

Use it for any text tag (h,p) or any other tag with a text content.
You can easily change all of them in the style.scss or in style.css

.fontcolor-regular
Default text color (#333333).

.fontcolor-invert
The inverted text color for darker backgrounds (#ffffff).

.fontcolor-medium-light
Medium text color (#eaeaea).

.hovercolor
For "hover" elements (#E84855).

.accent-color
Color for accent elements (#007EA7).

Grey palette colors

.**color00** (white)
…
.**color13** (close to black)

Background colors

Usable for sections and block containers.

.bg-red
.bg-orange
.bg-green
.bg-blue
.bg-darkblue
.bg-cyan
.bg-yellow
.bg-l-grey
.bg-grey

Grey palette backgrounds:

.bg-color01 (white)
…
.bg-color13 (close to black)

Pre-defined blocks

Margins/paddings

.e-block-regular
Default vertical margins/paddings.

.e-block-short
Smaller vertical margins/paddings.

.e-block-null
Zero vertical margins/paddings.

Typography
You can define it to any text tag or container.

Fonts

Regular Font (Raleway)
.font-regular-normal
.font-regular-bold

Accident Font one (Montserrat)
.font-accident-one-bold
.font-accident-one-normal

Accident Font one (Dosis)
.font-accident-two-normal
.font-accident-two-oblique
.font-accident-two-bold
.font-accident-two-bold-italic

Text Sizes e.t.c

.small
.extrasmall
.superheading
.uppercase

Block content alignment

.e-block-centered

Layout

Basic

.row-no-padding
.nopadding
Turn off the paddings or/and margins.

Dividers

.e-divider-1
…
e-divider-20

Define the divider's height from 10 to 200 pixels.

.e-divider-dynamic
Dynamic height divider. It's height is defined via @media depending the screen width.

Heights

.e-height-100
.e-height-200
.e-height-300
.e-height-400
.e-height-500

Define the element's height in the range from 100 to 500 pixels.

Widths

.e-fullwidth
.e-width-50
.e-width-60
.e-width-70
.e-width-80
.e-width-90

Define the element width in range from 100% to 50%.

Position

.e-absolute
.e-relative
.e-fixed

Display

.e-inline
.e-block
.e-inline-block
.e-centered
.e-hidden

Paddings for Containers

.padding-side-30
.padding-side-40
.padding-side-50
.padding-side-60

How-to and tips&tricks

1. How to change the sidebar from left-sided to right-sided?

It is easy if you use the SCSS pre-processor.
Just open the *style.scss* file, find following lines:

// Sidebar
@import "sidebar-left.scss";

Change the *sidebar-left.scss* to *sidebar-right.scss*

It will change the sidebar alignment.

2. How to make the slider not "full-screen" or not "full-height" as default?

The key settings of the Revolution Slider are in assets/custom/js/script.js

Find the /* Slider Revolution */ section.

Read the Slider Revolution online Documentation
http://www.themepunch.com/revsliderjquery-doc/slider-revolution-jquery-5-x-documentation/

Make the needed changes.

We can not write a direct instructions because of regular Revolution Slider improvements.

3. How to set up the Google map?

    - Open the assets/custom/js/script.js.
    - Find the /* Google map */ section.
    - Find the following coordinates settings:
        var $latlng = new google.maps.LatLng(52.5075419, 13.4261419),
    - make changes.

4. How to set up the Google analytics?

    - Open the assets/custom/js/script.js.
    - Find the /* Google Analytics */ section.
    - Uncomment the last two section lines.
    - Fill your GA ID in the'UA-********-**'

5. How to set up the PHP Contact Form?

    - Open the email_settings.php file
    - Fill a desired e-mail address and subject
